

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts and other lift trucks could have particular labels used in some hazardous locations. The mark denotes that this specific model of forklift meets the minimum standards of ANSI/UL 553 utilized for electric forklifts or ANSI/UL 558 meant for internal combustion engine forklifts.

The use for labels intended for lift lift trucks can be found in National Fire Protection Association NFPA 505 - Powered Industrial lift trucks including: Type Designations, Areas of Use, and Maintenance and Operation. Ask your local insurance provider and Fire Marshall for additional info concerning the approved uses of industrial powered lift trucks in your application.

If the specific lift truck satisfies the outlined criteria, labels could be placed. A labeled lift truck would show the type of designation put on the nameplate and will have a properly corresponding label put.
